

Global Patient Safety Collaborative (GPSC) Webinar Series 2020-2021

Capacity Building: Patient Safety Research

The GPSC webinar series was launched in May 2020 to support the implementation of the GPSC and will be organized on a monthly basis through the GPSC Network. The webinar topics will cover key patient safety issues and elements based on the country priorities and preferences. The webinar series will incorporate a range of speakers to bring varied perspectives on patient safety improvements and capacity building.

16 June 2021 (10:00-14:00 CEST)

Agenda

10:00-10:05 **Overview and Introduction**

Learning Objective 1: To recognise the need to know/understand the extent and nature of the problem of patient safety.

10:05-10:20 *Lecture:* Introduction to patient safety research and implications for systems

Learning Objective 2: To acknowledge the importance of local research to contextualise global evidence and understand why local evidence is crucial to raise policymakers' awareness on patient safety is important.

10:20-10:35 *Lecture & Reading:* Importance of local research to contextualise global evidence for policy makers

10:35-10:55 *Discussion:* Participants to share experiences on the importance of local research to contextualise global evidence

Learning Objective 3: To identify common methodologies for burden of harm estimation.

10:55-11:10 *Lecture:* Summary of common methodologies for burden of harm estimation

11:10-11:35 *Group work:* Participants to create list of methodologies for burden of harm estimation feasible to implement in respective countries

11:35-11:50 Break

11:50-12:10 *Group feedback:* Working groups to give feedback on suitable methodologies for in-country estimation of burden of harm

Learning Objective 4: To define different approaches to understand causes of harm and list key advantages and disadvantages of those approaches.

12:10-12:25 *Lecture:* Different approaches to understand causes of harm

Learning Objective 5: To understand how countries can estimate medication-related harm: the core indicator of the GPSAP Strategic Objective 3.

12:25-12:40 *Lecture:* Medication-related harm – estimating the burden, key considerations

12:40-13:00 *Case studies:* Medication related harm case studies & participant feedback

Learning Objective 6: To understand how to implement research for selected advanced indicators of the GPSAP Strategic Objective 3.

13:00-13:15 *Lecture:* Summary of implementing research for selected advanced indicators of the GPSAP Strategic Objective 3

13:15-13:40 *Discussion:* Participants to review advanced indicators and come up with the list of those that will be feasible to implement in their countries with justification

13:40-13:55 Feedback from all countries

13:55-14:00 **Conclusion**
